

## On the Natural and Spiritual Spread of Light

by Davey Pipkin, age 8

John 1: 4–6

“In him was life, and the life was the light of men.  
The light shines in the darkness,  
and the darkness has not overcome it.”

**T**he spread of natural light is infinite, unless it bumps into another object. However, did you know that one of Albert Einstein’s theories was that light bends? This is true for both kinds of light—both spiritual and natural. No matter what is in its path, light will find a way to reach someone. It will spread—and fast, too! Light travels at 183,000 miles per second. Before you know it, many people will have your light. And just as we were designed to be little mirrors of God’s glory, we will reflect His light. And like our own spiritual mirrors, we will reflect God’s light into other small mirrors, without ever losing the bright shine of God’s light.
